

# KEEP YOUR DOG HEALTHY FOR LESS with our monthly payment plan

## WHY WOULD YOUR PET NEED A PREVENTATIVE CARE PLAN?

### Vaccinations help healthy dogs stay healthy

Your veterinarian will recommend the vaccination protocol that is most appropriate for your dog based on lifestyle, breed and other important factors.

### Diseases can creep up quickly and quietly

Dogs age much more rapidly than we do. So even if your dog looks perfectly healthy, illness and disease could be lurking undetected. Physical exams and diagnostic tests are crucial for finding problems not visible to the naked eye.

### Prevention is the key to better health

Preventive care can improve your adult dog's quality of life and help add more healthy years. It's essential for detecting diseases early on, before they become more serious - and more expensive.

### Why does your dog need preventative care

Regular exams, screenings, and vaccinations are essential for your dog's continued health. Our preventive care plan protects your pet's health, while saving you money on the total cost of care. Best of all, the plan features budget-friendly monthly payments - making it easy to say 'yes' to the best for your dog.

#### PUPPY PREVENTIVE CARE PLAN

##### Optional Services

# KEEP YOUR CAT HEALTHY FOR LESS with our monthly payment plan

## WHY WOULD YOUR PET NEED A PREVENTATIVE CARE PLAN?

### Cats are really good at hiding illness

It's a common misconception that cats don't get sick. In fact, cats are susceptible to many forms of disease - regardless of whether they live indoors or outdoors. Regular veterinary care can help stop illnesses before they happen.

### Diseases can creep up quickly and quietly

Cats age much faster than we do. So even if your cat looks perfectly healthy, diseases and health problems could be lurking undetected. Physical exams and diagnostic tests are crucial for finding problems not visible to the naked eye.

### Prevention is the key to better health

Preventive care can improve your adult cat's quality of life and help add more healthy years. It's essential for detecting diseases early on, before they become more serious - and more expensive.
