

Preventive Care Plans

As part of our ongoing commitment to improving and extending the bond our clients share with their pets, we are offering preventive care plans for pets of all ages. This makes it as easy as possible to provide the best care from the time your pet is a puppy or kitten into their senior years. Below are our core beliefs regarding preventive care plans:

Our Pets Are Just Like Us.

At each stage of life, there are important diagnostic screenings, vaccines and treatments that are vital for keeping pets healthy.

Pets Age Up To 7 Times Faster.

Every 6 months equals several human years for pets, making it that much more important to have bi-annual head-to-tail examinations.

They Can't Tell Us.

Not only can't our pets tell us when something is wrong, but their innate behavior is to hide symptoms of illness or injury. Bi-annual examinations and diagnostic screenings do the talking for them.

Sometimes A Budget Saves Lives.

We believe in honoring the bond you have with your pet by doing all we can to ensure they stay happy and healthy. Offering preventive care plans, which allow you to budget for this care and make small monthly payments, is our way of making the cost of preventative care easier for more pet owners to afford.

Please let any our team members know if you have questions about our preventive care plans program or would like more information on enrollment!
