## WHY SHOULD YOUR PET HAVE A PREVENTATIVE CARE PLAN?

### Illness is more common than you think

Puppies are highly susceptible to diseases because their immune systems aren't yet fully developed. It's important to vaccinate and deworm your puppy on a regular schedule in order to provide maximum protection against contagious diseases.

### Growing bones need special care

Puppies seem to get bigger right before our eyes. Such rapid growth can come with its own set of problems. No matter what their breed, puppies need to be examined frequently in order to make sure their growth and development is on the right track.

### Prevention is the key to better health

Preventive care can help set the foundation for a lifetime of good health, so you and your puppy can spend more quality years together. It's essential for detecting diseases early on, before they become more serious - and more expensive.

### Why does your puppy need preventative care

Regular exams, screenings, and vaccinations are essential for your puppy's continued health. Our preventive care plan protects your pet's health, while saving you money on the total cost of care. Best of all, the plan features budget-friendly monthly payments - making it easy to say 'yes' to the best for your puppy.

## WHY SHOULD YOUR PET HAVE A PREVENTATIVE CARE PLAN?

### Vaccinations help healthy dogs stay healthy

Your veterinarian will recommend the vaccination protocol that is most appropriate for your dog based on lifestyle, breed and other important factors.

### Diseases can creep up quickly and quietly

Dogs age much more rapidly than we do. So even if your dog looks perfectly healthy, illness and disease could be lurking undetected. Physical exams and diagnostic tests are crucial for finding problems not visible to the naked eye.

### Prevention is the key to better health

Preventive care can improve your adult dog's quality of life and help add more healthy years. It's essential for detecting diseases early on, before they become more serious - and more expensive.

### Why does your dog need preventative care

## WHY SHOULD YOUR PET HAVE A PREVENTATIVE CARE PLAN?

### Illness is more common than you think

Kittens are highly susceptible to diseases because their immune systems aren't yet fully developed. It's important to vaccinate and deworm your kitten on a regular schedule in order to provide maximum protection against contagious diseases.

### Growing kittens need special care

Playful as they are, kittens are actually quite delicate and can suffer from a number of health problems in their first year. They need to be examined frequently to make sure their growth and development is on the right track.

### Prevention is the key to better health

Preventive care can help set the foundation for a lifetime of good health, so you and your kitten can spend more quality years together. It's essential for detecting diseases early on, before they become more serious - and more expensive.

### Why does your kitten need preventative care

## WHY SHOULD YOUR PET HAVE A PREVENTATIVE CARE PLAN?

### Cats are really good at hiding illness

It's a common misconception that cats don't get sick. In fact, cats are susceptible to many forms of disease - regardless of whether they live indoors or outdoors. Regular veterinary care can help stop illnesses before they happen.

### Diseases can creep up quickly and quietly

Cats age much faster than we do. So even if your cat looks perfectly healthy, diseases and health problems could be lurking undetected. Physical exams and diagnostic tests are crucial for finding problems not visible to the naked eye.

### Prevention is the key to better health

Preventive care can improve your adult cat's quality of life and help add more healthy years. It's essential for detecting diseases early on, before they become more serious - and more expensive.
